INTRODUCTION

HARINDER INDUSTRIES P. LTD. is a **TENAC GROUP COMPANY** – established in 1970. HIPL captured a major portion of **bulb holders** as a **tier-2 OEM supplier** in 1985.

The company diversified into **Automotive Switches, Trailer Connectors, Wire Harnesses, Electronics Parts (Flashers, Relays, etc.), Mobile charging sockets, Grab handles and Plastic molded & Sheet metal components** and became one of the leading Tier 1 supplier to Leading OEM's in Tractor & Trailer segment. Some of our products relish up to 90% of the OE market share due to our optimized cost and excellent quality levels.

In Addition to the Automotive segment HIPL business portfolio is expanding in other segments as well which consist of EV segment, Gensets, and home appliances. Presently we are OEM supplier to more than 20 OEMs

In order to serve our customer with JIT deliveries, HIPL has two units in **Delhi & Haryana**. The company has invested in technologies to ascertain that key manufacturing processes are done on the best in class manufacturing equipment s, consistent processes with automation, & Poka-yoke. Continual improvement using Lean manufacturing, Kaizen & 5S approach has become DNA of our company.

In-house design team equipped with latest designing software tools, Tool room for making molds, jigs and fixtures, Standard room & Testing Lab for testing product reliability and durability are supporting us to offer the latest designs and durable products to our customers in lowest possible time. As well help to remain competitive .

The key to success of any company depends on the team members and management approach . HIPL follow high level of employee orientation and ensure the best capable team members are engaged and retained. Leadership team has good industry experience in OEM's and MNC's. We are growing with our vision to become a leading Global OEM supplier. Customer 1st is the motto given to the team with 24 hours customer support at all levels.

"Innovation as growth driver". Is our approach for this decade where technologies are growing at very high pace.

Our Approach - Innovation as growth driver.
